

# 1 Executive Summary

D4.2c is the last of a series of deliverables that report on completed ETSF user projects. Six ETSF calls for proposals were held during the duration of the ETSF-I3 FP7 e-infrastructure project. 151 proposals were submitted by 112 different users, and evaluated.

109 were accepted for training or collaboration (68 ETSF-I3 funded). By the end of June 2011, all of these 109 projects had started (68 ETSF-I3 funded), and 104 were completed (68 ETSF-I3 funded).

During Period 3 strictly speaking (1<sup>st</sup> January 2010 – 30 June 2011), 81 projects were being implemented (54 ETSF-I3 funded), of which 76 were completed (54 ETSF-I3 funded). 55 of these 76 completed projects in Period 3 fall into one of the deliverable D4.2 category (40 ETSF-I3 funded).

**All of the four D4.2 categories are represented by more than two of the completed projects.** 15 projects with experimentalists requiring scientific and numerical-technical support, 24 projects with experimentalists asking for calculations, 13 customized user training projects and 3 projects with industry have been completed during period 3, which fulfils D4.2c.
